

# CAREERS IN FOCUS

Sunnier Days; Advice from 5th Graders|x|This book is for all kids who want to make good choices in their daily life events. We have given you some ideas of how we try to handle some situations and help make you feel like you are not alone. Our hope is to empower other children to solve their own problems with positive solutions. ~ Fifth Graders from Arlington Elementary, Ft. Wayne, Indiana

Everyday Science Mysteries|x|The story format is one of the most effective ways to engage students' attention right from the start. Each chapter includes a list of science concepts explored, targeted strategies for using the stories with children in grades K–8, and key matching story concepts with corresponding standards in the National Science Education Standards.

Yet More Everyday Science Mysteries|x|In the fourth book of this award-winning series, author Richard Konicek-Moran explores 15 new mysteries children and adults encounter in their daily lives. Relating the mysteries to experiences familiar to elementary and middle school students, the stories show how science is part of everyday life and initiate inquiry-based learning by leaving each mystery without an ending. Students identify the problem to be solved, formulate questions, form hypotheses, test their ideas, and come up with possible explanations.

Even More Everyday Science Mysteries|x|What are the odds of a meteor hitting your house? What are "\"warm\"" clothes anyway? Do you get "\"more\"" sunlight from Daylight Saving Time? Everyone loves a good mystery and these unfold in the 15 stories presented in Even More Everyday Science Mysteries, the third volume in author Richard Konicek-Moran's award-winning series. Again, the author uses stories without endings to teach a science principle, allowing the students to investigate how each story can be resolved. All the stories relate to the world around us and encourage students to "\"take ownership\"" of their learning.

More Everyday Science Mysteries: Stories for Inquiry-Based Science Teaching|x|Through 15 mystery stories, this book memorably illustrates science concepts for students and reinforces the value of learning science through inquiry. Each mystery presents opportunities for students to create questions, form hypotheses, test their ideas, and come up with explanations. Focused on concepts such as periodic motion, thermodynamics, temperature and energy, and sound, these mysteries draw students into the stories by grounding them in experiences students are familiar with, providing them with a foundation for classroom discussion and inquiry. Activities to Enhance Social, Emotional, and Problem-solving Skills|x|

"What are the odds that a meteor will hit your house? do you actually get more sunlight from Daylight Savings Time? Where do puddles go? By presenting everyday mysteries like these, this book will motivate your students to carry out hands-on science investigations and actually care about the results. These 19 open-ended mysteries focus exclusively on Earth and space science, including astronomy, energy, climate, and geology. The stories come with lists of science concepts to explore, grade-appropriate strategies for using them, and explanations of how the lessons align with national standards. They also relieve you of the tiring work of designing inquiry lesson from scratch."

They also relieve you of the tiring work of designing inquiry lessons from scratch. *Everyday Physical Science Mysteries* | Defines the top twenty-one careers in education, discussing the nature of the work, educational or training requirements, getting started, advancement possibilities, salary, employment outlook, and sources of more information. *Careers in Focus* | Students speak up about American education in this book from 826 National, the celebrated tutoring center founded by Dave Eggers and Nínive Calegari. This unique volume collects personal essays, letters, and stories by dozens of high school students who were given the chance to speak their minds about their own education. From letters to their teachers to essays and vignettes inspired by the works of James Baldwin and Sherman Alexie, this collection of student writing contains startling insights for educators, parents, and anyone invested in our future. *Be Honest* includes writing from students across the country, of every ethnic group and financial bracket: A girl from an immigrant family is put in an ESL class even though her English is fluent; an African American boy talks about the social pressures that prevent him from asking his teacher for help; and a privileged private school student describes his transition to public school—and reports that he was able to learn more with the increased freedom it brought. The newest book from 826 National, the celebrated organization founded by Dave Eggers and Nínive Calegari, coauthors of the bestselling *Teachers Have It Easy*—is a much-needed addition to the current national conversation about our schools. “826 helps young people learn that language can be play, that work can be joyful, and that they themselves can be the inventors and caretakers of their world. I have seen it with my own eyes.” —Michael Chabon, Pulitzer Prize–winning author of *The Amazing Adventures of Kavalier & Clay* *Be Honest* | Winner of the 2013 American Educational Studies Association's Critics Choice Award! When teacher education is located on a university campus, set apart from urban schools and communities, it is easy to overlook the realities and challenges communities face as they struggle toward social, economic, cultural, and racial justice. This book describes how teacher education can become a meaningful part of this work, by re-positioning programs directly into urban schools and communities. Situating their work within the theoretical framework of prioritizing community strengths, each set of authors provides a detailed and nuanced description of a teacher education program re-positioned within an urban school or community. Authors describe the process of developing such a relationship, how the university, school, and community became integrated partners in the program, and the impact on participants. As university-based teacher education has come under increased scrutiny for lack of “real world” relevance, this book showcases programs that have successfully navigated the travails of shifting their base directly into urban schools and communities, with evidence of positive outcomes for all involved. *Moving Teacher Education into Urban Schools and Communities* | This guide to the elementary school-level state tests is an indispensable tool that parents will turn to in order to understand and help their children succeed on these crucial tests. *Kaplan/Parent's Guide to the MCAS 4th Grade Tests* | Teachers are torchbearers—leaders who impart knowledge, truth, or inspiration to others. Pamela Farris, joined by Patricia Rieman in the latest edition of this exceptional foundations text, clearly demonstrates how teachers bear the torch. The authors’ well-researched approach provides both positive and negative aspects of education trends. Their generous use of examples shows how teaching and schooling fit into the broader context of U.S. society and how they match up with other societies throughout the world. Farris and Rieman’s lively writing style instills teacher education candidates with a lucid understanding of such topics as philosophy and history of education, national trends, requirements of becoming a teacher, teachers’ salaries, how schools are governed and funded, demographic changes and expectations for the future, differences in rural and urban schools, and use of technology. Detailed lists of a variety of websites provide additional resources. Anecdotes of professionals in the field—authentic-voice narratives with frank insights into real-world teaching experiences—punctuate the text. Boxed scenarios concentrate on important issues and educators, energize readers’ interest, and stimulate proactive thinking. Other outstanding features are the book’s affordability and versatility. Instructors can easily assign all or a portion of the chapters to fit course needs. *Weekly Compilation of Presidential Documents* | A collection of the best thoughts, ideas, methods, and wisdom on teaching, from educators past and present. This book blends the observations of contemporary educators with words of wisdom from teachers of the past in a collection that is sure to engage and inspire anyone in the teaching profession. Featured educators include Plutarch (“The mind is not a vessel to be filled, but a fire to be kindled”), Robert Louis Stevenson (“To be what we are, and to become what we are capable of becoming,

is the only end in life”), and many others. In addition, award-winning educators from across the U.S. share their insights on a variety of subjects, including responsibility and accountability, self-esteem, comprehension, motivation, and methods of teaching that accommodate various learning styles. This book has something to teach everyone about teaching. Teaching, Bearing the Torch|x|In the mental health field, a vigorous consumer and family movement - including groups such as the National Alliance for the Mentally Ill and National Depressive and Manic-Depressive Association - involves hundreds of thousands of members and has caught the attention of the professional system. Understanding the Self-Help Organization provides detailed, comprehensive coverage of this phenomenon. This comprehensive volume focuses attention on three critical areas: public policy and self-help, participation - particularly by minorities - in self-help, and explanatory frameworks. But at times, almost all teachers struggle to manage

classroom behavior, and to motivate students to learn. Drawing on decades of research on behavioral science, this book offers teachers practical strategies to get students learning. The key is students' habits. This book reveals simple, powerful ways to help students build habits of success. Harry Fletcher-Wood shows how teachers can use behavioral science techniques to increase motivation and improve behavior. He offers clear guidance on topics such as using role models to motivate students, making detailed plans to help students act, and building habits to ensure students keep going. The book addresses five challenges teachers face in encouraging desirable behavior: Choosing what change to prioritize Convincing students to change Encouraging students to commit to a plan Making starting easy Ensuring students keep going Workshops, checklists and real-life examples illustrate how these ideas work in the classroom and make the book a resource to revisit and share. Distilling the evidence into clear principles, this innovative book is a valuable resource for new and experienced teachers alike.
